

WORLD-CLASS HOCKEY FIELD

Stellenbosch University built and started using a brand-new artificial grass hockey field in 2006. The cost of the new hockey field and of upgrading the B field amounted to R9 million. With this new hockey field the University has established itself as a sports destination of international stature. During the SPAR Challenge between South Africa and India in 2006, as part of a development project, Matie hockey players took young players in hand.
